-I have an ongoing project to create a compilation of a **Midi-Recorded Anthology of Accompaniments to Standard Trombone Repertoire**. These accompaniments are an ongoing project using Finale Music Notation program, Yamaha Disklavier, and Logic X for Macintosh computer to develop sequenced accompaniments for use as a tool in the preparation of solo literature. I have initiated collaborative efforts with other trombonists nationwide to expand this project. In addition, I have assigned sequencing projects to students so that they may learn this essential skill. I currently have 600 solo accompaniments sequenced. I generally add new works to this collection every year. This year I added 10 new works to the library and established the midi library for student use in Westbrook Music Building.
